

# How-to Guide

Request Books from the NIMAC

Need a textbook for your student that isn't available in Bookshare? For students with IEPs, textbooks often can be acquired through the National Instructional Materials Access Center (NIMAC), a federally-funded repository of digital versions of K-12 print textbooks and related printed core instructional materials.

Most [states](#) have named Bookshare as an Authorized User (AU) of the NIMAC. These states give Bookshare permission to obtain books from the NIMAC on their behalf, upon request from educators. In other states, Bookshare operates as a NIMAC Accessible Media Producer (AMP).

Please note: Only K-12 students who have public school IEPs and are on organizational accounts (or have individual memberships that are connected to organizational accounts) can receive NIMAC-sourced books.

- 2) Ask your [State's NIMAC Coordinator](#) to assign the book to Bookshare.
- 3) Once Bookshare receives notification that the book has been assigned to us, we will process the book and notify the requesting educator when the book has been added to collection. Turnaround time depends on how long it takes the State Coordinator to assign the book to Bookshare.

Once the NIMAC book is in the Bookshare collection, Sponsors on organizational accounts can assign it to their student(s) with IEPs via the [Assign & Read feature](#) or on a [Reading List](#). Students then simply log in with their usernames and passwords and read on the devices of their choice. To learn more about how students access their assigned books, review the [How to Guide: How Students Access Assigned Books](#).
